

PRO Series™

Stealth Watering System™

The PRO Series™ Stealth Watering System™ incorporates many unique features, making it the best in its class and the most convenient to install. They are:

- **One-size-fits-all.** We have been reliably following this principle with our BIS™ since 1991.
- **No barbed fittings to break!**
- **Fastest tubing installation.** Unique push fit tubing ports make tubing installation fast, easy, and secure. Tubing is released by simply pushing on white collar.
- **Lowest profile.** The lowest profile single point watering system available anywhere.
- **Widest operating pressure range.** Operating pressure range of 3 to 45 psi.
- **Abuse Resistant Tubing.** The system tubing is kink and crush resistant. With a small bend radius, it fits the smallest cells easily, including 5 and 7 plate batteries.
