

# PRO Series™

## SmartBlinky™ Battery Watering Monitor

Let your batteries tell you when they need watering

Red Light = Water Required

Green Light = Water Level is OK

### Red and Green Indication with Smart-Logic

The SmartBlinky™ indication logic features a slow, steady, bright green pulse when the battery is “OK”. When the battery requires water, the indicator changes to a red, irregular flash.

### Highly Visible Indicator & Remote Mountable Level Probe

The SmartBlinky features the largest and brightest indicator lamp available on any battery electrolyte monitor. The remote electrolyte probe is small enough to fit even the smallest cells. The indicator body can be mounted for best visibility.

### “Smart-Sensing” Technology

The SmartBlinky monitors the electrolyte level over a period of time before it “decides” to change indication. This ensures a more reliable signal than older technologies which have no intelligence and can flicker between red and green indications.

### UL® Classified

You can be sure your Battery Watering Monitor is safe because SmartBlinky Battery Watering Monitors are approved by Underwriter’s Laboratories to meet their standards for electrical safety. That means we not only use parts that are manufactured to UL standards, but each finished piece must also conform to their standard.

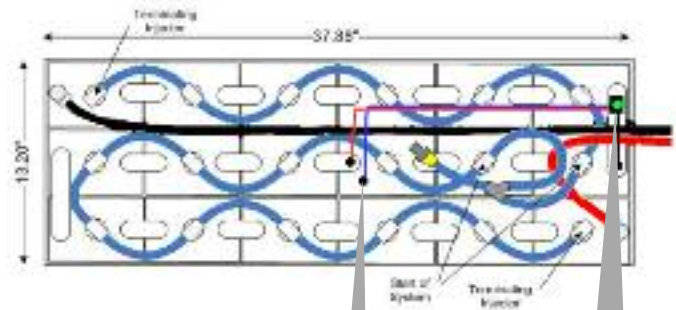

Classified by Underwriters Laboratories Inc. as an Electrical Accessory for use in Industrial trucks.

## Protect your people and your bottom line

- Never waste time checking batteries that don't need water
- Reduces employees' exposure to acid
- Prolong battery life — never let a battery dry out
